

ABOUT ME

I've always been fascinated by how things work, but I'm even more obsessed with how to make them work better. As an aspiring engineer, I view the world through a lens of analytical curiosity, but I ground my ideas in pragmatic execution. To me, innovation isn't about ignoring the past; it's about building upon it. I strive to understand the history of a system so I can focus my energy on solutions that solve actual problems and add real value through innovation. I thrive at the crossroads of electronics, digitalization, and economics. I love the technical challenge of circuits and code, but I never lose sight of the business reality. I believe the best engineering doesn't just push technology forward, it pushes the business forward. "Progress begins in the mind and reveals itself in performance."

Professional interests: Industrial engineering & IoT, economic analysis & strategy development, process optimisation & digital transformation, knowledge management

EDUCATION

Bachelor in Industrial and Mechanical Engineering | Dual study
Freie Universität Bozen | 2021–Today

Technical school for electronics and industrial informatics
Technische Fachoberschule Oskar von Miller- Meran | 2016–2021

WORK EXPERIENCE & INTERNSHIPS

Office Assistant in the administration

IDAL BAU of Fatos Karasani – Meran | 02/2022-present
Administrative office assistant in family business, ensuring smooth operations.

- Supported daily operations of self-employed construction business.
- Managed email communication with clients, suppliers, and partners.
- Maintained organized digital and physical filing system.
- Coordinated scheduling and basic customer service tasks.

Global Production Engineer

Dr. Schär – Postal | 06/2023-07/2025 My tasks included:

- Significant involvement in the cross-plant implementation of the maintenance software by independently consolidating master data.
- Developing user documentation and video tutorials to enhance user acceptance and improve the software's application efficiency.
- Providing integral support to the department in operational and organizational project tasks.

Global Technical Project Manager

Dr. Schär – Postal | 01/2023-06/2023
Regarding technical projects in the food industry.

Corporate Technical Project Manager

Dr. Schär – Postal | 07/2022-12/2022
My tasks included:

- Support in issuing invoices
- Assistance in technical purchases
- Management of technological projects with internal project management tools
- Drafting of technical specifications and requirements for technical systems
- Participation in high-priority transversal projects
- Development of inter-establishment technology guidelines
- Optimisation and stabilisation of processes for plant managers
- Standardisation and development of technologies between plants
- Identification of optimisations and investment proposals for automation and rationalization
- Supervision of the introduction of maintenance software and inter-establishment assistance
- Implementation of data-driven decision-making processes in production
- Management of PowerBI internal dashboards

Corporate Technical Project Intern

Dr. Schär – Postal | 07/2021-06/2022
Internship in the field of technical project management involved several key activities and responsibilities:

- Participation in the implementation and data consolidation of a cross-site maintenance software, with a specific focus on spare parts management.
- Optimization of various standard documents by integrating form-control elements.
- Provided support to the specialist department in operational project work.

Traineeship | Electrician

Zoeschg GmbH – Meran | 07/2020–08/2020
My area of expertise included

- Assistance in the electrical installation, wiring, and troubleshooting of residential and commercial environments.
- Maintenance and installation of electrical systems, smart lighting systems, and electric charging stations.
- Support to the setup and testing of electrical systems under supervision.

Traineeship | Refrigeration Technician

Frigotherm Ferrari – Lana | 07/2019–08/2019
My field of work involved the service and installation of refrigeration systems. Some of the skills and knowledge I acquired include:

- Assisting in the assembly and installation of refrigeration and air-conditioning systems.
- Performing basic maintenance, diagnostics, service, replacement, and troubleshooting tasks.
- Learning the fundamentals of thermodynamics, cooling systems, and HVAC operations.
